

ASX ANNOUNCEMENT, 26 FEBRUARY 2008

---

## Temperature Correction, Torrens Project Area, South Australia

---

Please be advised that the Company's ASX Announcement dated 25 February 2008 contained an error in relation to one of the three drill holes reported, namely Gollum 1.

The corrected heat-flow and modelled temperature result for this drill hole are detailed below:

Hole Name	Hole Depth	Heat-Flow	T 5000m
Nazgul 1	600m	106 mW/m <sup>2</sup>	248°C ± 6°C
Sauron 1	375m	106 mW/m <sup>2</sup>	248°C ± 6°C
<b>Gollum 1</b>	<b>501m</b>	<b>90 mW/m<sup>2</sup></b>	<b>202°C ± 5°C</b>
Gandalf 1	585m	Results to be Returned	
Balrog 1	507m	Results to be Returned	

The amended result from Gollum 1 remains consistent with the Company's stated target for heat generation and is consistent with the identification of a new geothermal field at Parachilna. The results from Nazgul 1 and Sauron 1 remain the same as previously reported.
